BRASS SINKS

MASTER TAP MAKERS

THE STORY

It is nearly impossible to envision the Kenny&Mason collection without brass. Since the beginning of our story brass has played a key role in our production and our craftsmanship was partially built on this amazing alloy.

Throughout the constant movement in styles and interiors we quickly picked up on the growing demand for brass sinks and basins.

Our expert craftsmen mostly relied on their experience in the production of our brass bath range and went to work on something new.

What started as a one piece tryout in the showroom of one of our dealers quickly grew in popularity and got the attention it deserved. Due to this growing demand the plan was laid out for the collection we proudly present today.
